## FORTY SEVENTH ANNUAL COAL REPORT

### INTRODUCTION

This report constitutes the forty-seventh annual presentation of the coal mining industry of the State. For comparison of the number of mines, men, tonnage and days of operation with the report of last year, the following summary is presented:

	1928	1927	Increase (+) Decrease (—)
Number of shipping mines.....	206	241	—35
Number of local mines.....	651	665	—14
Output of shipping mines, tons.....	54,284,184	44,926,433	+9,357,751
Output of local mines.....	1,926,898	2,023,267	—96,369
Employees in shipping mines.....	61,154	74,117	—12,963
Employees in local mines.....	4,354	4,455	—101
Average days worked, shipping mines.....	150	112	+38
Average days worked, local mines.....	126	124	+2

Attention is also called to the tables in the report showing the mines using mechanical loading machines and to those that are "rock-dusted"; also those that are worked on an open or closed light basis. These features have not been reported heretofore and it is hoped will add valuable information.

The Department is glad to report that interest in training in mine rescue and first aid methods is increasing. More people received this training in 1928 than in any year since the establishment of the Mine Rescue Stations.

A general summary of the items contained in this report follows:

### CHANGE OF NAME

### FATAL ACCIDENTS

February 3, Peter Buyon, miner, age 51 years, widower, died from injuries received the day before, when struck by a railroad car. Deceased had finished his day's work in the Canton Coal Company's mine and was walking on the railroad track, returning to his home. When he reached a point about 500 feet from the shaft, he was struck by an empty car that was being switched to its place for loading. He leaves six dependent children. As this was not an accident occurring in the line of duty, it is not charged against the coal production.

March 6, Peter W. Guillian, miner, age 50 years, married, was killed in Earl Gorsuch's mine by a fall of soapstone. He leaves a widow and one child.

September 13, D. J. Marquis, mine manager, age 54 years, married, was killed in Marquis and Wheelhouse mine by being overcome by carbon monoxide gas. He leaves a widow.

November 11, Fred Dagen, laborer, age 49 years, married, died from injuries received one week earlier in Galesburg Mining Company's mine, when he fell from tippie to ground. He leaves a widow and two children.

November 19, John Adams, miner, age 42 years, married, was killed in Galesburg Mining Company's mine. Deceased was riding in the man trip to his working place. The trip, running faster than usual, he thought was running away, and he jumped over the side of the car and was caught between the trip and coal rib. He leaves a widow and two children.

December 10, Martin Nash, laborer, age 41 years, was killed by being struck by railroad cars and killed instantly while at work at the No. 9 mine, United Electric Coal Company. He leaves a widow and one child.

December 11, Lloyd Nesbit, miner, age 17 years, was killed by a fall of coal and rock in Illinois Colliery Company's mine.

December 15, Charles Long, miner, age 45 years, married, died from injuries received eight days earlier in Bennett and Wilcoxon's mine. Deceased was killed by an explosion of powder which he was carrying to his room. It is not known how this powder was ignited, as there were no eye-witnesses to the accident, but, it is thought that he set the powder down and it came in contact with the machine cable, which had the current on at the time. He leaves a widow and one child.

Respectfully submitted,

THOMAS P. BACK,  
*Inspector.*

January 17, Ben Whited, night boss, age 39 years, married, died from injuries received the day previous in Valier Coal Company's mine. Deceased was caught between two motors and had one leg cut off and the other one badly injured. He leaves a widow.

February 15, Arthur Hughes, motorman, age 28 years, married, died from injuries received two days previous in Old Ben Coal Corporation's No. 8 mine. Deceased was preparing to take out a trip of loads, and as he was walking along the side of the trip counting the loads, a fall of coal from the face knocked out a prop, which struck him on the head, fracturing his skull. He leaves a widow and two children.

March 2, Max Sheruba, miner, age 41 years, was killed in Old Ben Coal Corporation's No. 14 mine. Deceased was walking along the haulage road and stopped in cross-cut to let a trip of loaded cars pass. The trip had come uncoupled, and not noticing it, when the motor and four cars had passed, he resumed his walk on the track, was run down by the other cars and almost instantly killed. He leaves a widow and six children.

March 3, John Shiver, miner, age 52 years, married, died from injuries produced by a fall of rock the day previous in Old Ben Coal Corporation's No. 8 mine. He leaves a widow and four children.

March 6, Joseph Taggart, machine runner, age 41 years, married, was killed in Old Ben Coal Corporation's No. 8 mine, when caught against machine frame by a large lump of coal falling from roof. He leaves a widow and three children.

March 22, George Bennett, miner, age 57 years, married, was instantly killed by a fall of coal in Franklin County Coal Company's No. 5 mine. He leaves a widow.

March 28, Mark Enrico, laborer, age 26 years, married, was caught between two pit-cars and instantly killed, in Franklin County Coal Company's No. 7 mine. He leaves a widow.

April 22, Silas Whittington, timberman, age 40 years, married, was killed in Chicago, Wilmington & Franklin Coal Company's No. 2 mine by a fall of rock. He leaves a widow and two children.

June 8, S. R. Peterson, blacksmith, age 57 years, married, was killed in Chicago, Wilmington & Franklin Coal Company's No. 2 mine. Deceased was helping to repair the cage in the tip-

ple. The engineer, receiving a signal from the bottom, moved the cage, throwing him to the ground, striking the landing gate, causing instant death. He leaves a widow and one child.

July 7, Frank Hulse, laborer, age 39 years, married, was killed in Old Ben Coal Corporation's No. 14 mine. Deceased was working on guides in the main hoisting shaft about 25 feet from the surface. He had burned a bolt out which connected guide with bunting. He then leaned against bunting to drive the bolt out of the guide, when the bunting gave way, allowing him to fall to bottom of shaft, a distance of 450 feet. He leaves a widow and three children.

July 10, Ross White, laborer, age 43 years, single, was run over and killed by railway cars at Chicago, Wilmington and Franklin Coal Company's No. 2 mine.

July 13, Milton Dollars, machineman, age 36 years, married, was caught between coal rib and pit-car and killed, in Franklin County Coal Company's No. 7 mine. He leaves a widow and one child.

September 14, Martin Guinney, face boss, age 50 years, married, employed by Valier Coal Company, died from some unknown cause. It appears that deceased and three other men had been working together for some time, drawing loose rock and putting up lagging, when he said he was sick, and came down from the scaffold on which they were working. The other men finished the job and about one o'clock accompanied the deceased to the bottom of the shaft. He then went on top and told the mine manager he was going. Arriving home, he called the doctor and told him he had got some bad air. The doctor gave him some medicine and at 8 P. M., about six hours afterward, called again, but did not think his patient was seriously ill. About 11 P. M., his wife called the doctor, but before he arrived, the patient was dead.

The men working with deceased said they could not detect any bad air or gas. No autopsy was held and the doctor refused to sign the death certificate. The Coroner's jury returned a verdict of "Came to his death from unknown cause."

This fatality is not charged in this report against the coal production.

September 25, Mike Macello, miner, age 40 years, married, was instantly killed by being caught between car and rib, in Old Ben Coal Corporation's No. 15 mine. He leaves a widow and four children.

## REPORT OF THE MINE RESCUE AND FIRST AID DIVISION

---

The work of the various Mine Rescue Stations in responding to calls for assistance and the training of persons in First Aid and Mine Rescue methods is herewith presented:

On January 9, 1928, a body of gas was ignited, in a manner that is undetermined, causing an explosion in which 21 men lost their lives, at the Industrial Coal Company's mine No. 18, at West Frankfort. Mine Rescue teams from Eldorado, Herrin, Benton and Duquoin Stations responded to the call. The teams from Benton and Herrin were the first to arrive at the mine and proceeded immediately to the scene of the explosion. Two men were found partially barricaded in an entry and rescued; other men working in the affected territory were either killed by the force of the explosion or by the effect of the afterdamp. The Rescue teams from Herrin and Benton completed the work of recovering the bodies and the Duquoin and Eldorado teams were not used after being called.

On August 10, 1928, the Herrin and Benton teams were called to assist in a mine fire at the Chicago, Wilmington and Franklin Coal Company's Mine Number Two. Being unable to extinguish the fire, it was sealed. Eight days later, the Benton team was called to the mine to open the fire seal, but being unsuccessful, they were again called on September 15th and opened the seal and explored the sealed territory.

On November 28, 1928, the Eldorado team was called to assist at a mine fire in the O'Gara Coal Company's Mine Number Three, which was brought under control and cleaned out.

On November 19, 1928, the LaSalle team was called to open a fire seal at the East Mapleton Coal Company's Mine, Mapleton, and was successful in opening and exploring the sealed territory.

The Springfield team received no call for assistance from any of the mines during the past year.

In addition to the various Mine Rescue teams' necessity of being ready at all times, both day and night, to answer calls for assistance, each Station has been active, through its Superintendent, in training persons in the work of First Aid to the injured and Mine Rescue methods. This part of the work of the Superintendents has been highly satisfactory. 14,333 persons were trained in First Aid to the injured and 121 were trained in Mine Rescue and First Aid. This is the largest number of persons trained by the Superintendents in any one year since the

opening of the Mine Rescue Stations and has had considerable bearing upon the reduction of accidents at the mines where training has been completed. It is hoped that the value of this training will be recognized by other operators and miners of the State and that the coming year will show a greater amount of interest in this training.

The following table will show in detail the number of men trained at each of the Stations:
